

Koenigsegg GDPR-login

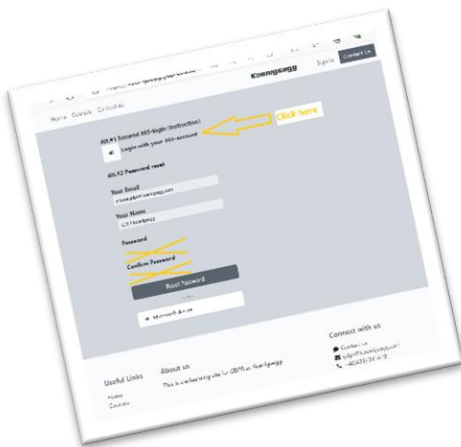

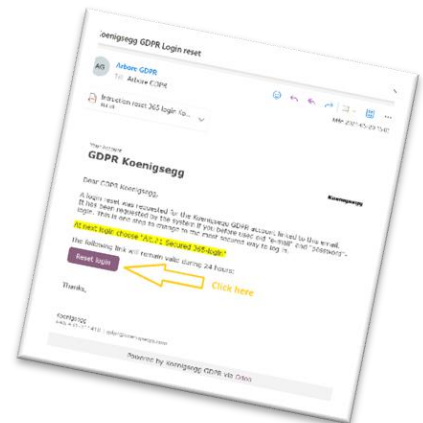

GDPR and **Information Security** is very important as we today have a lot of information that is highly valuable and, in many cases, accessible on Internet. This needs protection, and one exposed part of the security chain is the company's staff. This course's purpose is to strengthen the security with knowledge and practical information for this part of the chain.

This login to the e-learning platform will be via your **Koenigsegg Microsoft 365-account**.

We have provided this guide for you to easily start with the process. This will not apply for new users since they already got the invitation with the new 365-login.

For users that **before used e-mail and password-login** will have to reset their login, this is done by an e-mail sent out from the system or that you click "[Login Reset](#)".

#1 The "Login-reset" is sent out in an e-mail.
With in 24-hours click on the button "Reset login"

#2 Check that your e-mail address and Name is correct.
Then click "**Login with your 365-account**"
(No new password needs to be entered)

#4 For login in the future please click on "**Alt.#1 Secured 365-login**"

Please contact us if you have any questions.
